ECO- DISHWASH

Originally developed in Scandinavia this unique combination of surface-active agents, sequestrants, inhibitors and alkaline builders was designed for use in enclosed cabinet dishwashers over a varied temperature range. Removes everyday stains and soil from food preparation equipment and cutlery, plates etc.

- Effective at high dilution
- Low foaming
- Inhibits limescale formation
- Does not form white deposits on long term use
- Effective in hard and soft waters
- Contains a tannin remover
- **Biodegradable**

Application

Remove scraps of food from dishes and pans etc before stacking. Concentration will depend upon the degree of soiling and hardness of water. Normally 0.1% - 0.5% is satisfactory. More effective cleaning will be achieved at higher temperatures; the ideal being 60°C. The results can be enhanced by the use of a rinse aid.

CONTAINS CORROSIVE ADDITIVE AND MUST BE HANDLED WITH CARE.

ALWAYS USE WITH NORTHERN ENVIRONMENTAL APPROVED DOSING EQUIPMENT.

Do not use to clean aluminium, lead crystal and hand painted china.

Available in 5, 25, 30, 205 and 1000 litre plastic containers
