ANTI FOAM 421

A highly effective silicone based antifoam concentrate specially developed for turbulent systems and other areas where a quick knockdown of foam is required.

- **Designed for durability in recirculation systems**
- **Stable to high shear**
- **Effective at low concentrations**
- **Does not contain petroleum solvents**
- **Easy to use emulsion form**
- **Long-lasting**
- **Not classified as hazardous**

Application

Depending upon degree of foam add up to 1.0 litres per 1000 litres of fluid to be treated. If the addition area is not flowing a pre-dilution of antifoam in an equivalent amount of water is advisable.

Try and add antifoam to the source of foam for greatest effect. Repeat at regular intervals should the foaming persist.

ALWAYS REPLACE LID FIRMLY AND PROTECT FROM FROST

Available in 5, 25, 205 and 1000 litre plastic containers
